

MORGAN VANCE

Email: morgan.vance.synthetic@example.com | Phone: +1-555-018-4451 | Seattle, WA | Target Role: Machine Learning Engineer

PROFESSIONAL SUMMARY

Machine Learning Engineer specializing in deep learning, predictive modeling, NLP, and MLOps. Experienced in building, training, and deploying PyTorch and TensorFlow models to production environments.

TECHNICAL SKILLS

ML Frameworks: PyTorch, TensorFlow, Scikit-Learn, OpenCV, Hugging Face, XGBoost

Languages & Cloud: Python, SQL, C++, AWS SageMaker, Docker, MLflow, Git

WORK EXPERIENCE

Machine Learning Engineer | NeuralScale AI (2022 - Present)

- Developed and deployed predictive forecasting models using XGBoost and PyTorch with 94% precision.
- Built real-time model monitoring and automated experiment tracking pipelines using MLflow and FastAPI.
- Accelerated GPU inference latency by 35% using TensorRT optimization on AWS EC2 clusters.

AI Research Assistant | DataMind Institute (2021 - 2022)

- Trained transformer-based NLP sentiment models on 500k customer feedback documents.
- Implemented data preprocessing pipelines for large-scale unstructured text datasets.

EDUCATION

M.S. in Artificial Intelligence | University of Washington (2020 - 2022)

B.S. in Computer Science | Purdue University (2016 - 2020)
