

# ALEX CHEN

Email: alex.chen.synthetic@example.com | Phone: +1-555-019-2831 | San Francisco, CA | Target Role: Software Engineer

## PROFESSIONAL SUMMARY

Innovative Software Engineer with 3+ years of experience building scalable backend APIs, distributed microservices, and database systems using Python, Java, SQL, REST API, and Docker.

## TECHNICAL SKILLS

**Programming Languages:** Python, Java, C++, SQL, HTML, CSS, JavaScript

**Frameworks & Infrastructure:** FastAPI, Django, Flask, Git, REST API, PostgreSQL, Docker, Redis

## WORK EXPERIENCE

### Software Engineer | Apex Tech Solutions (2022 - Present)

- Engineered high-throughput REST APIs using Python and FastAPI, processing 2M daily requests.
- Optimized PostgreSQL database queries and indexes, reducing average API response latency by 45%.
- Automated microservice deployment pipelines using Docker containers and CI/CD workflows.

### Junior Backend Developer | CloudScale Systems (2021 - 2022)

- Developed core authentication and user management services using Python and Java.
- Integrated Redis caching layer, decreasing database server load during peak traffic by 30%.

## EDUCATION

B.S. in Computer Science | California State University (2017 - 2021)
